This is UNEVALUATED Information

5. The cooperative's finishing workshop at Calea Grozescu No. 17, has the following equipment:
- a. Spool winding machines, old, 100 spindles, 6 h.p. transmission motor.
 - b. Two bobbin winding machines, old, 30 spindles each; two bobbin winding machines, old, 20 spindles each. A 6 h.p. transmission motor powers all four machines.
 - c. Five spooling machines [redacted] with a 8 h.p. transmission motor. 25X1
 - d. Twenty machines for winding paper twists [redacted] all driven by a transmission motor of unknown h.p. 25X1
 - e. Five machines for winding balls, driven by a motor of unknown h.p.
6. The cooperative's fitting shop has poor equipment; cotton hanks are wound by hand.
7. The cooperative has two workshops on Calea Dorobantilor. One meets the special needs of the cooperative, and the other manufactures paper bases for twists and cardboard boxes for packing all of the cooperative's products.
8. The cooperative's dyeing and cleaning workshop, located on Calea Cujda, is at the disposal of private persons.
9. There is a general shortage of spindle-rings. A factory at Stalin (Brasov) has tried unsuccessfully to manufacture the rings, because the necessary, special tempering of the steel was not possible. The same factory has also tried to produce needles for knitting machines, but this attempt failed for the same reason.
